Instantbond 113

4. FIRST AID MEASURES

Ingestion:	Ensure breathing passages are not obstructed. The product will polymerize rapidly and bond to the mouth making it almost impossible to swallow. Saliva will separate any solidified product in several hours. Prevent the patient from swallowing any separated mass.
Inhalation:	Remove to fresh air. If symptoms persist, obtain medical attention.
Skin Contact:	Do not pull bonded skin apart. Soak in warm soapy water. Gently peel apart using a blunt instrument. If skin is burned due to the rapid generation of heat by a large drop, seek medical attention. If lips are bonded, apply warm water to the lips and encourage wetting and pressure from saliva in mouth. Peel or roll lips apart. Do not pull lips apart with direct opposing force.
Eye Conttact:	Immediately flush with plenty of water for at least 15 minutes. Get medical attention. If eyelids are bonded closed, release eyelashes with warm water by covering with a wet pad. Do not force eye open. Cyanoacrylate will bond to eye protein and will cause a lachrymatory effect which will help to debond the adhesive. Keep eye covered until debonding is complete, usually within 1-3 days. Medical attention should be sought in case solid particles of polymerized cyanoacrylate trapped behind the eyelid caused abrasive damage.
To Physician:	Surgery is not necessary to separate accidentally bonded tissues. Experience has shown that bonded tissues are best treated by passive, non-surgical first aid. If rapid curing has caused thermal burns they should be treated symptomatically after adhesive is removed.
5. FIRE FIGHTING MEASURES	
Flash Point (TCC):	150-200ºF
Recommended Extinguishing Agents:	Water spray (fog), foam, dry chemical or carbon dioxide.
Special Firefighting Procedures:	Fire fighters should wear positive pressure self-contained breathing apparatus (SCBA).
Hazardous Combustion Products:	Trace amounts of toxic fumes may be released on incineration and the use of breathing apparatus is recommended.
Unusual Fire or Explosion Hazards:	None
Flammable/Explosive Limits – lower %:	Not applicable
Flammable/Explosive Limits – upper %:	Not applicable
6. ACCIDENTAL RELEASE MEASURES	3
Personal Precautions:	Wear proper protective equipment
Measures for Environmental Protection:	Do not allow entry into drains or surface waters
Clean-up Measures:	Do not use cloths for mopping up. Flood with water to complete polymerization and scrape off the floor. Cured material can be disposed of as non-hazardous waste.

7. HANDLING AND STORAGE

Handling:	Avoid contact with eyes, skin and clothing. Avoid breathing vapor and mist. Wash thoroughly after handling. Avoid contact with fabric or paper goods. Contact with these materials may cause rapid polymerization which can generate smoke and strong irritating vapors, and cause thermal burns.		
Storage:	Keep refrigerated		
8. EXPOSURE CONTROLS, PERSONAL			
Eye/Face Protection:	Chemical splash goggles or safety glasses with side shields.		
Skin Protection:	Use nitrile gloves and aprons as necessary to prevent contact. Do not use PVC, nylon or cotton.		
Respiratory Protection:	Use NIOSH approved respirator if there is a potential to exceed exposure limits		
Engineering Controls:	Positive down-draft exhaust ventilation should be provided to maintain vapor concentrations below TLV.		
9. PHYSICAL AND CHEMICAL PROPERTIES			
Physical State:	Liquid		
Color:	Clear		
Odor:	Sharp, irritating		
Vapor Pressure:	Less than 0.2 mm		
Vapor Density:	Approximately 3		
Solubility in Water:	Polymerized by water		
Specific Gravity:	1.10 at 75ºF		
Boiling Point:	More than 300°F		
Volatile Organic Compound Content	< 20g/L (California SCAQMD Method 316B) (estimated)		
Evaporation Rate (Ether = 1)	Not available		
pH:	Does not apply		
10. STABILITY AND REACTIVITY			
Stability .			
Stability: Hazardous Polymerization:	Stable under recommended storage conditions. Rapid exothermic polymerization will occur in the presence of water, amines, alkalis and alcohols.		
Hazardous Decomposition Products:	None		
Incompatibility:	Polymerized by contact with water, alcohols, amines, or alkalies.		
Incompatibility:	Polymerized by contact with water, alcohols, amines, or alkalies.		

Instantbond 113

Toxicity:	Estimated oral LD50 > 5,000 mg/kg. Estimate	ed dermal LD50 > 2,000 mg/kg
Ingredients:	Literature Referenced Target Organ and Other Health Effects	Carcinogen Status NTP IARC OSH
Ethyl Cyanoacrylate	ALG IRR RES	NO NO NO
Abbreviations: ALG Allergen IRR Irritant RES F	Respiratory	
12. ECOLOGICAL INFORMATION		
Ecological Information:	Not available	
13. DISPOSAL CONSIDERATIONS		
Recommended methods of disposal:Dispose of according to Federal, State and IEPA Hazardous Waste Number:Not an RCRA hazardous waste		ocal regulations.
