

# Ring Type Joint Gaskets

---

## Urethane Ring Type Joint Gaskets

### Product Description:

Hi-Tech Gaskets supplies valve test gaskets in polyurethane. The polyurethane ring joint gaskets are an effective and non-damaging method for testing a gland before use. The uniquely shaped profile energizes the seal in the groove under pressure, replicating a stainless steel R or BX ring joint gasket.

- Test gaskets last up to 100 runs
- Non-damaging method for testing gland before use
- Suitable for water and nitrogen pressure tests
- Temperature range -54°C (-65°F) to 105°C (221°F)

Available for classes 150#, 300#, 400#, 600#, 900#, 1500# and 2500#.

All Hi-Tech Gaskets' polyurethane ring joint gaskets are manufactured by Hi-Tech Seals.
