RyFlor™ RF40	-268°C to 316°C

Joint Sealant

Product Description

Joint sealant is composed of our RyFlor™ material which provides near universal resistance and good compressibility. RyFlor’s isotropism provides a highly fibrillated microstructure with equal strength in every direction. It will not degrade or deteriorate, making it an excellent choice for handling ultra-pure fluids for the biotech and pharmaceutical industries. The joint sealant rope has an adhesive peelable tape on one side, allowing for easy installation. Joint sealant is suitable for FDA applications.

We distribute joint sealant by the spool. Spool lengths vary based on the C/S.

C/S	Feet/Spool	Flange Size
1/8	100, 1000	1/2 to 3/4
3/16	100, 1000	1 to 1 1/2
1/4	50, 100, 500	2 to 3 1/2
3/8	25, 50, 250	4 to 6
1/2	15, 30, 150	8 to 16
5/8	15, 30, 150	17 to 20
3/4	15, 30, 50, 100	24 to 36
1	15, 30, 75	36 to 60
2	39	60 to up
