

## Protective Face Masks

**Now Available at Hi-Tech Seals**

To help our customers and employees stay safe during the COVID-19 pandemic, we are now stocking 3-layer, non-medical masks. The two outside layers are made from polypropylene spun-bound non-woven fabric. These layers block visible substances such as droplets and absorb exhaled air leaving your skin dry and comfortable. The middle layer is a melt-blown non-woven fabric that effectively filters non-oily, harmful substances such as viruses and microorganisms. This is the same fabric used in medical masks, though unlike medical masks that must be packaged individually, our masks are available in:

- 50 qty/bag, Part # KIT NONMEDBLUEMASKBX
- 40 bags/case, Part # KIT NONMEDBLUEMASKCS

Even if you have no symptoms, these masks are designed to protect the people around you\* in situations where physical distancing is difficult to maintain. It prevents respiratory droplets from landing on surfaces and the people around you. Some people may also find that the masks stop them from touching their mouth and nose area.

### Mask features:

- Melt-blown, non-woven fabric that filters such substances as viruses and microorganisms
- Non-woven, absorbent material external layers
- Disposable
- Easy to wear
- Non-toxic, non-irritating
- Ear loops

It is important to understand that non-medical masks have their limitations and need to be used safely. When using a non-medical mask, best practices include:

- Washing your hands before and after wearing mask
- Dispose of masks when they get damp, soiled, or crumpled
- Not touching the outside of the mask whilst wearing it
- Ensure the mask fits snug on your face, with no gaps
- Do not share your mask with others

For more information on our masks contact your local branches.

\* Please note these masks have not been proven to protect oneself against infection.
