TSP - Piston Seals

PISTON CLEARANCE LIMITS

Bore Size Range	Max. Dia. Clearance
.250" to .500"	.004"
.501" to 1.750"	.005"
1.751" to 4.875"	.007"
4.876" to 9.000"	.009"
9.001" — up	.010"

Piston Diameter is equal to bore diameter (A), minus (Max. Dia. Clearance) for specific bore size range.

For sizes not listed contact Macrotech/Polyseal for technical assistance.

Standard material consists of a 70 Shore A Nitrile Seal element and tough extrusion resistant nylon backup rings, designed specifically for hydraulic and pneumatic service. Other materials are available upon request.

TSR - Rod Seals

THROAT CLEARANCE LIMITS

Rod Size Range	Max. Dia. Clearance
.123" to .375"	.004"
.376" to 1.500"	.005"
1.501" to 4.500"	.007"
4.501" to 8.500"	.009"
8.501" — up	.010"

Throat diameter is equal to Rod diameter (A) plus (Max. Dia. Clearance) for specific rod size range.

Some sizes shown may require a non-recurring set-up charge.

TSP and TSR seals have radial cross section dimensions equal to AS-568A O-rings, and are also available for grooves designed for an O-ring with one backup (-1), and for O-rings with two backups (-2). For specific information on individual applications, contact Macrotech/Polyseal.

T Seal Standard Materials

Seal Materials	Material	Application Recommendation
	Nitriles (NBR)	
	Nitrile 70A, A-8501	Standard Nitrile for most fluids. Temperature range from -35°F to 265°F.
	Nitrile 70A, A-8504	Low Temperature Nitrile for most fluids. Temperature range from -65°F to 240°F.
	Carboxylated Nitrile 70A, C-7001	Carboxylated Nitrile for most fluids. Improved wear properties. Temperature range from 0°F to 275°F.
	HNBR 75A, C-7021	Hydrogenated Nitrile for extreme wear and better fluid resistance. Temperature range from -50°F to 320°F
	Fluorocarbon (FKM)	
	Poly VI 70A, V-7501	Fluorocarbon rubber for applications requiring improved fluid resistance. Temperature range from -20°F to 400°F.
	Poly VI 70A, V7510	Fluorocarbon rubber for applications requiring improved fluid resistance. Peroxide cured TerPolymer for the most severe fluids. Temperature range from -20°F to 400°F.
	Ethylene Propylene (EPR)	
	EPR 70A, E-8001	EPR/EPDM rubber for phosphate ester and water/water glycol fluids. Temperature range from -65°F to 300°F. Not recommended for applications where mineral oils may be present.
Backup Ring Materials	Nylon, P-2505 or #707	Nylon for most standard fluid power applications. Temperature range from -65°F to 300°F Not recommended for applications where water may be present.
	PTFE, #700	PTFE for low pressure applications, where low friction is required, or Nylon can not be used.
	PEEK, #745	PEEK for extreme high pressure/high temperature applications.
