

NEW

ISO 9001:2000

Are you experiencing difficulties installing seals?

Hi-Tech Seals is now offering a "Seals Assembly Press" that makes installing Rod and Piston seals quick and easy. In three easy steps, anyone can install Rod Seals ranging from 5/8" to 1-1/4" in diameter and Piston Seals ranging from 1-1/4" to 3-1/4" in diameter (other diameters available upon request)

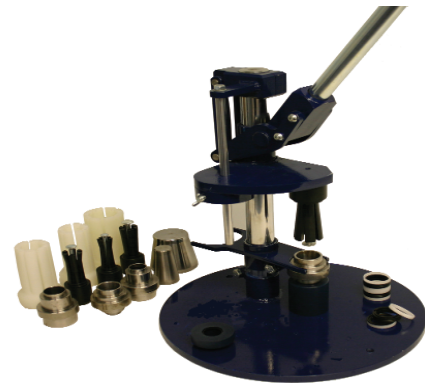

Speed and Safety

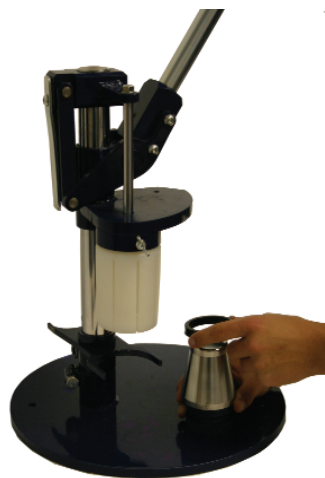

Rod

The benefits of the "Seals Assembly Press":

- Rapid Rod and Piston Seal Installation
- Reduces the risk of seal damage during installation
- Safer procedure for the assembler when compared to traditional methods

Piston

Funnels and PM Pressers for Rod Seals assembly are available in the following diameters: .625" / .750" / .875" / 1.000" / 1.125" and other diameters on request.

Manual press prearranged for a quick replacement of the pressers. A reliable partner on your assembly bench. By preventing any damage to the seal, it will make your job easier, safer and more productive.

By replacing the Funnels and the PM Pressers with Cones and PF Pressers, you can use the same press to assemble Piston Seals for the following diameters: 1.125" / 1.375" / 1.500" / 1.750" / 2.000" / 2.250" / 2.500" / 2.625" / 2.750" / 3.000" / 3.250"
